

ERBA CONTROLS FOR BIOCHEMISTRY

Assayed Values for ERBA Reagents, LIQUID STABLE Reagents & SYSTEM PACK Reagents in NORMAL and ABNORMAL range

For *in-vitro* Diagnostic use only

INTENDED USE

ERBA NORM

ERBA PATH

Control Serum (assayed) is intended for monitoring the accuracy and precision of commonly used clinical chemistry assays in normal and pathological range respectively.

PRINCIPLE OF THE PROCEDURE

This human serum control is to be used in the same way as an unknown specimen that would be used in accordance with the direction of the assay procedure.

The results obtained for the control are to be compared with the assigned values given in the "assay data" section of the insert, and an evaluation made by standard statistical techniques to determine if the procedure is within the control limits.

COMPOSITION

The Control serum is prepared from human serum with chemical additives and tissue extracts of human and animal origin. Bacteriostatic agents have been added. The control is provided in lyophilized form for increase stability.

WARNING

IT IS RECOMMENDED THAT THIS PRODUCT BE HANDLED WITH SAME PRECAUTIONS USED FOR PATIENT SPECIMEN.

RECONSTITUTION

- Allow the vial and AQUA-4 (supplied in the kit) to attain room temperature. Add exactly 5 ml of AQUA-4 and allow to stand for 30 minutes. Swirl occasionally.
- Swirl the contents gently to ensure homogeneity before using as sample for testing. Avoid formation of foam.

STORAGE & STABILITY

Prior to reconstitution

The control should be stored at 2-8°C and is stable till the expiry date printed on the label.

After reconstitution

The constituents when protected from contamination are stable upto 5 days when stored at 2-8°C except for ALP whose activity may increase with time. Values for ALP, CPK and ACP are temperature dependent. Since Bilirubin, CPK and Uric Acid are photolabile, the control should be protected from light and kept refrigerated when not in use. Apparently Uric acid values may increase over time when assayed by some methods.

LIMITATIONS

The results obtained using the control are dependent upon several factors. Erroneous results can occur from reconstitution inaccuracy and the technique errors associated with the assay procedure. The serum is not compatible for use with o-Toluidine Glucose procedures. Improper storage or handling of the control can also affect the results. If there is a visible evidence of microbial growth in a vial, do not use that vial.

PACK PRESENTATION

Product Code	Pack size	Controls	Aqua-4
120218	4 x 5 ml	ERBA NORM	1 x 20 ml
120219	1 x 5 ml	ERBA NORM	1 x 5 ml
120220	4 x 5 ml	ERBA PATH	1 x 20 ml
120221	1 x 5 ml	ERBA PATH	1 x 5 ml
120222	2 x 2 x 5 ml	ERBA NORM / ERBA PATH (COMBIPACK)	1 x 20 ml

Manufactured by : **TRANSASIA BIO-MEDICALS LTD.**, Nalagarh Road, Village Malpur, Baddi, Dist. Solan, (HP) - 173205.
In Technical Collaboration with : **ERBA diagnostics Mannheim GmbH** Mallastr., 69-73, D - 68219, Mannheim / Germany

a) Values obtained after calibration using XL Multicalibrator.

b) Assay Temperature = 37°C.

CONVENTIONAL UNITS

The conversion factors and significant digits places to be used in reporting the mean values and ranges (for both SI and conventional units) are presented in Table 1:

Table : 1

Analyte	S.I. Units	Significant Digits	Conversion Factor	Significant Digits	Conventional Units
Albumin	g/L	XX	0.1	XX	g/dl
Bicarbonate	mmol/L	XX	1	XX	mEq/L
Bilirubin	μmol/L	XXX	0.059	XXX	mg/dl
Calcium	mmol/L	XXX	4	XXX	mg/dl
Chloride	mmol/L	XXX	1	XXX	mEq/L
Cholesterol	mmol/L	XX	38.7	XXX	mg/dl
Creatinine	mmol/L	XXX	11.3	XX	mg/dl
Glucose	mmol/L	XX.X	18	XXX	mg/dl
Magnesium	mmol/L	XX.X	2.43	XXX	mg/dl
Phosphorus	mmol/L	X.XX	3.1	X.XX	mg/dl
Total Protein	g/L	XX	0.1	XX	g/dl
Triglycerides	mmol/L	XX	87.5	XXX	mg/dl
Urea	mmol/L	XXX	6.01	XX	mg/dl
Uric Acid	mmol/L	XXX	16.8	XX	mg/dl
