

Single Patient
Use tourniquet

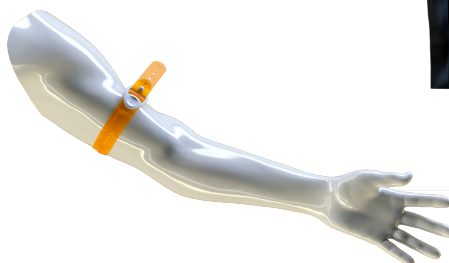

The Gold Standard of Single Patient Use tourniquets

The Tournistretch® from ASepHealthcare was developed by Healthcare Professionals to provide users with a premium Single-Patient Use tourniquet for routine, challenging blood sampling and venepuncture. It's intuitive pull through system, easy re-adjustment and quick release provides professionals with easy application and assists in single handed operation.

The Tournistretch® is made from a super soft polymer providing users with a strong secure STRETCH for optimal tensioning, whilst maintaining a soft flexible feel. This customised material assists in improving patient experience, especially patients with delicate skin, with no additional pinching or underlying damage.
